

We honor life through donation.™

Dear Driver Education Instructor,

Thank you for educating your students about the importance of organ, tissue and eye donation. This is a great opportunity to prepare new drivers about the Michigan Organ Donor Registry to help save and heal lives. The law requires driver education programs to provide 10 minutes of instruction in Segment II about the vital importance of organ, tissue and eye donation. This toolkit will satisfy that requirement.

Included in this toolkit are a variety of documents to assist you in educating your students. All of the toolkit materials are also available on the Gift of Life Michigan website at [golm.org/get-involved/youth-outreach](http://golm.org/get-involved/youth-outreach). Those materials are:

- Secretary of State Letter
- Driver Education Instructor Script
- Parent Letter
- Student Letter
- All of Us Brochure
- Quiz
- Video
- Wallet Card

Please use the script provided to initiate your discussion of donation with the students. We suggest that you show the video and then distribute the brochure, wallet card, parent and student letters. To test the student's knowledge of donation, please use the quiz. For more information on donation, please visit Gift of Life Michigan at [golm.org](http://golm.org)

Thank you for educating your students about the vital importance of saving and healing lives through organ, tissue and eye donation.

Sincerely,

*Taneisha Campbell*
